Campus map

Please bring your **Personal ID** or **Student ID** for check-in and campus access. **No valid ID, no campus entry.**
Only registered students are permitted to attend the event.
Any unauthorised or unregistered individual entering the campus or event will be asked to leave.

Important notes

- Participants are responsible for arranging their own transportation to and from the event. Travel expenses are not covered by the organisers.
- Motorbike parking is available on campus (parking fees apply). **If you are riding a motorbike, please park at temporary parking, come to the CHECK-IN area before proceeding to the parking basement or event venue.**
- Professional photography and videography will take place during the event. By attending, you consent to the use of your image and/or likeness in photographs, videos, and other promotional materials produced by RMIT University.
- In accordance with RMIT campus policy, this is a **smoke-free and alcohol-free** event.
- During the event, food and drink may be served. Please be aware of your own allergies and notify the organising team should you need assistance.

What to bring

- Personal laptop and charger
- Extension cord (if needed) – Please bring an extension cord for your own use, if required.
- Water bottle – Water refill stations are available on campus. Please bring your own bottle, as cups and bottles will not be provided.

Technical Preparation Guidelines

To help participants prepare for the RMIT Hackathon 2026, we recommend the following preparations before the event.

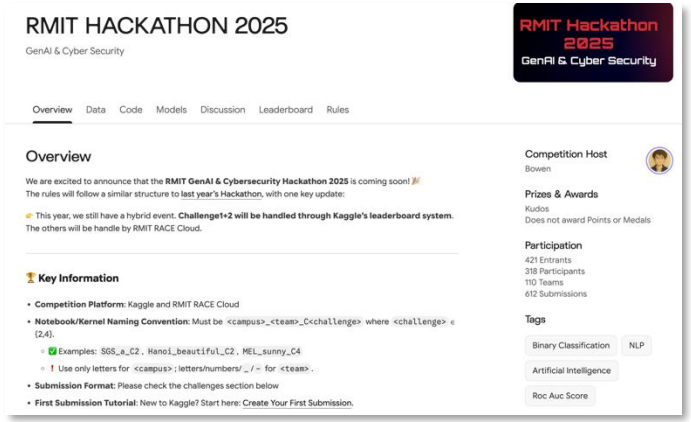

1. Create a Kaggle cccount

Create a Kaggle account to access challenge materials, work with datasets, submit solutions and view the leaderboard.

kaggle

2. Familiarise yourself with the relevant platforms

- Kaggle: Learn to access datasets, use notebooks, submit solutions and view the leaderboard.
- AI-assisted coding tools (vibe coding): Familiarise yourself with an AI coding agent and basic application development workflows.
- Participants may refer to the **RMIT Hackathon 2025 Kaggle competition page** to explore the Kaggle platform.

3. Review the provided technical resources

- The organisers will provide relevant technical documentation, starter resources, example implementations and instructions before the event.
- The 2026 Kaggle competition page and preparation materials will be made available before the event. Further details will be announced.

4. Review basic programming and technical concepts

Depending on the challenges, participants may benefit from familiarity with:

- Python and introductory machine learning.
- Data processing and model evaluation.
- AI-assisted coding (vibe coding) and application development.
- APIs and basic software development workflows.

Prior experience is beneficial but not mandatory. Supporting resources will be provided.

5. Prepare to explore and solve problems

Think creatively, explore available tools, collaborate with others and develop practical solutions to the challenges.
